Safety Cover Padding

Extends the life of your pool cover by creating a barrier between the cover and deck to prevent chafing. Fits all mesh or solid safety covers. Installs in minutes. Available at all locations.

Tips for Closing Your Pool

This has been a wonderful summer to enjoy the swimming pool but now that school is back in session many pool owners will close the pool down for the season. Until the temperature in the pool remains below 60 degrees we DO NOT recommend closing the pool down. Here are a few tips to follow when you do decide to close the pool.

1. **Clean your pool.** Make sure you brush and clean the walls using *Off the Wall*. Vacuum the pool to remove all the debris.
 2. **Clean your filter.** If you have a sand or DE filter use a good filter cleaner like *Strip Kwik* to clean oils and scale from the filter bed or grids.
 3. **Balance your pool water.** Proper water balance is always important but often something people neglect to do when they close the pool for the winter. We recommend you bring a sample in for testing before putting the pool to bed because it's important to have the hardness in the proper range to prevent etching, scaling or deposits during the winter. It is also important that the pH and alkalinity be in balance to protect your pool surface and equipment.
 4. **Add winter chemicals.** Add Artic Blue winter shock and Artic Blue Algae Protector. It is also helpful to add an enzyme product, like BioGuard Natural Result to protect against waterline buildup during the winter months and BioGuard Scale Inhibitor. Circulate for 24 hours.
 5. **Lower the water level in the pool below the returns.** Unless your pool can circulate with the water level below the skimmer do not lower the level if temperatures are below freezing until the morning of the closure.
 6. **Evacuate water from the lines and equipment.** Add rubber expansion plugs to prevent water from getting back into the lines. Cover pool.
- *Test the pool every couple of weeks until the pool freezes to make sure a chlorine residual is maintained. Add liquid chlorine as needed.

To set up your pool closure please call:

1-800-876-4340

or

509-928-6585

Ask for Jordan,
Anthony,
or Tyler

Pool was not winterized properly resulting in a cracked filter tank and plumbing lines.

FREE

Water Testing

Protect your pool. Don't put your pool into hibernation before bringing a water sample to be tested for the overall balance. Your pool water can damage your pools finish or liner if not properly balanced when you close it.

Use a clean plastic container and take sample from 18" down in pool and away from the pool returns. Bring the sample in for testing within 2 hours from taking sample from pool. Do not let sample sit outside or in a hot car for any length of time.

Hot Tub Cover Options

Vinyl Hot Tub Covers

If your cover weighs about 200 lbs., making it difficult to use your tub, it's time for a new cover. The cover has lost its insulating value and is costing you more money on your energy bill.

If your cover puddles when it rains that normally means your cover has broken or bowed foam cores and you should replace the cover. Your cover is costing you money if heat is escaping through a torn hinge.

If your cover has a foul odor which makes enjoying your time in the hot tub less enjoyable, you need a new cover. A good cover makes a big difference in your hot tub experience.

Not all covers are made the same. We carry the quality Sunstar covers. Give us a call or stop in today to order a replacement cover.

Reasons to Insist on Sunstar

1. Steel Reinforcement for extra foam strength.
2. Tapered Foam Core.
3. Vapor Seal Wrap to help prevent mildew.
4. Exclusive GHSG Super Heat Seal Gasket.
5. Energy Efficient Virgin Foam Cores.
6. Triple Reinforced Tie-Down Straps.
7. Super Strength padded handles.
8. Double stitching on cover for extra strength.
9. 4 layers of vinyl in the Tough "n" Sturdy Hinge.
10. 28 Points of Internal Reinforcement.
11. Marine Grade Vinyl.
12. Full 3 Year Warranty on materials & workmanship.
13. UL classification with ASTM Safety Standard.

Grill World

Bake, Roast, Smoke & BBQ

The Big Green Egg is the most versatile and effective means of baking, roasting, barbecuing and smoking all kinds of foods. It's a smoker, a grill and an oven all in one and you can easily use it year round because the ceramic walls hold the heat and moisture extremely well. The walls retain, circulate and radiate heat evenly so you never need a rotisserie to get perfectly cooked meats. This insulating quality cooks foods with an amazingly small consumption of charcoal.

Your food will be juicier and more flavorful using the Egg, with little to no shrinkage. The Egg gives a natural and wholesome flavor to all your foods. When baking, you'll get a "brick oven" flavor and crust. You can cook a ham or turkey to perfection in just a few hours. Plus you can control the degree of smoked favor you want your meats to have. Enjoy just a hint of smoke or have your meats smoked through to the bone.

The Egg is safer to use than a metal grill because the ceramic does not become as hot on the surface, just warm to the touch.

The Eggs have a lifetime Ceramic warranty. You can sear your steaks or fish at 700 degrees or more. Smoke your roast or ham at 200 degrees or less. Your Egg will perform superbly at high and low temperatures and you will enjoy restaurant quality food year round from a grill that will last your lifetime!
