Free Water Testing

Keeping your pool sparkling clear can be as easy as 1,2,3. There are a few simple things that need to be done on a routine basis.

1. Circulate the pool at least 10-12 hours per day to maximize your sanitizer's efficiency. The more the water is in motion, the harder it is for bacteria to take hold.
2. Make sure your filter is working effectively so that it removes both visible debris and microscopic matter. Chemically clean the filter to remove oils and deeply embedded debris approximately every 6 weeks or at least twice a season.
3. Clean your pool weekly. Brush and vacuum the walls and floor. Even if you have an automatic vacuum it is important to brush the pool or employ a pool service for weekly care. Check your pools skimmer and pump baskets and empty debris as needed to assure proper circulation.
4. Maintain proper water care parameters and water chemistry. Test the pool weekly for pH and sanitizer levels and make sure you bring in a water sample every 4 to 6 weeks during the season to make sure the water is balanced properly to protect your pools finish and keep your swimmers comfortable. Treat and adjust the water balance as needed.

True Bargain or ... Not?

You can pick up chemicals for your pool/hot tub at just about any discount store anymore. The problem is that not all chlorine is the same. Some products are made with more filler than actual product and can cause your equipment to experience problems. Some products are made for pools only and should not be used in a hot tub.

We have also found that many products can appear to be a good bargain but in fact are costing you more to maintain a proper level because they have very low levels of active ingredients and it takes 4 times the amount of product to do the job.

So before you purchase what appears to be a great deal, make sure you are getting what you need to do the job!

The New Engineered Concrete Wall Hybrid Pool

Now you can have the best of both worlds - the strength of a gunite pool and the affordability of a vinyl pool. All of this is backed with a lifetime warranty on the pool wall. That's what a hybrid pool is all about. It provides you with all the benefits of a vinyl pool — the comfort, the ease of use, the durability, the way it handles the water chemistry and stands up to the weather combined with the durability and flexibility of custom gunite elements. Now you can have a built in sun deck, deep end benches, diagonal steps or wedding cake steps in a vinyl pool. We can help you design a pool that incorporates many custom features for you to enjoy!

Swimming provides you and your family with so many benefits. It's not only an investment in your health and well being but an investment that provides you with years and years of fun relaxation. No

more wasting time packing up and driving to the lake. No more fighting the crowds at the public pool or lake, just relax in the privacy of your own backyard.

Talk to us about the many options you have when planning for your pool. We can help you design and build the pool of your dreams.

Energy Saving Pumps Save \$\$\$'s

Until a few years ago pool pumps operated at one or two speeds, which resulted in higher energy costs and faster wear and tear on the motor. Now Pentair variable speed pumps offer programmable, variable speed technology which allows you to program different speeds for different jobs. The pump works less and uses less energy to perform it's duty. It is capable of cutting energy costs by 90% and typically pays for itself in the first two to four years. They are also extremely quiet.

Pentair offers different models of variable speed pumps depending on what is needed for proper operation of the pool.

Why Shock a Pool/Hot Tub?

The purpose of shocking a pool/hot tub is to oxidize materials that have a chlorine demand or form combined chlorine such as ammonia, amino acids, skin, mucus discharge, urine, suntan lotion, hair spray, leaves, grass and other organic material. Shocking prevents the formation of chloramines which are less effective disinfectants, the cause of eye burn and obnoxious odors. We recommend shocking a pool/spa once a week and whenever your chlorine test shows combined chlorine.

Time for a new Hot Tub Cover?

If your hot tub cover is heavy and hard to remove, it's not only making it hard to use your tub but it is costing you money because it's lost its insulating value and it's time to replace it.

Reasons to Insist on a quality Cover

1. Steel Reinforcement for extra foam strength.
2. Tapered Foam Core.
3. Vapor Seal Wrap to help prevent mildew.
4. Energy Efficient Foam Cores.
5. Reinforced Tie-Down Straps.
6. Double stitching on cover for extra strength.
7. Marine Grade Vinyl.
