Time for a new Hot Tub Cover?

If your hot tub cover is heavy and hard to remove, it's not only making it hard to use your tub but it is costing you money because it's lost its insulating value and it's time to replace it.

Reasons to Insist on a quality Cover

1. Steel Reinforcement for extra foam strength.
2. Tapered Foam Core.
3. Vapor Seal Wrap to help prevent mildew.
4. Energy Efficient Foam Cores.
5. Reinforced Tie-Down Straps.
6. Double stitching on cover for extra strength.
7. Marine Grade Vinyl.

Why Shock a Pool/ Hot Tub?

The purpose of shocking a pool/hot tub is to oxidize materials that have a chlorine demand or form combined chlorine such as ammonia, amino acids, skin, mucus discharge, urine, suntan lotion, hair spray, leaves, grass and other organic material. Shocking prevents the formation of chloramines which are less effective disinfectants, the cause of eye burn and obnoxious odors. We recommend shocking a pool/spa once a week and whenever your chlorine test shows combined chlorine.

Basic Pool Care

is as Simple as

**Free
Water
Testing**

Keeping your pool sparkling clear can be as easy. Here are a few simple things that need to be done on a routine basis.

1. Circulate the pool at least 10-12 hours per day to maximize your sanitizer's efficiency. The more the water is in motion, the harder it is for bacteria to take hold.
2. Make sure your filter is working effectively so that it removes both visible debris and microscopic matter. Chemically clean the filter to remove oils and deeply embedded debris at least twice a season.
3. Clean your pool weekly. Brush and vacuum the walls and floor. Even if you have an automatic vacuum it is important to brush the pool or employ a pool service for weekly care. Check your pool's skimmer and pump baskets and empty debris as needed to assure proper circulation.
4. Maintain proper water care parameters and water chemistry. Test the pool weekly for pH and sanitizer levels and make sure you bring in a water sample every 4 to 6 weeks during the season to make sure the water is balanced properly to protect your pool's finish and keep your swimmers comfortable. Treat and adjust the water balance as necessary.
