Better Health ... The Easy Way

For good health, practice good eating habits, exercise and use a sauna as part of your daily routine. It's a great way to make huge gains in your personal wellness. Burn calories, sweat out toxins, boost your immune system, enhance your blood circulation and relax your muscles. A sauna can help you improve your skin tone, increase collagen production and enhance your endurance performance. All of this in just 20 minutes or so a day and all while you sit and relax. What better way to achieve good health? Come in and check out Pool World's selection of quality Finnleo Saunas. For more information visit www.finnleo.com.

Why Shock a Pool/Hot Tub?

The purpose of shocking a pool/hot tub is to oxidize materials that have a chlorine demand or form combined chlorine such as ammonia, amino acids, skin, mucus discharge, urine, suntan lotion, hair spray, leaves, grass and other organic material. Shocking prevents the formation of chloramines which are less effective disinfectants, the cause of eye burn and obnoxious odors. We recommend shocking a pool/spa once a week and whenever your chlorine test shows combined chlorine.

A Clean Filter Is Key To Good Filtration

Maintaining your pool filter and keeping it clean is important to the filters performance. Body oils, calcium deposits, debris and other components can embed in the filter and prevent it from operating at full capacity to clean the water in the pool or hot tub. Oils, dirt and debris can build up in the filter and will prevent the pool from circulating as well which leads to poor clarity or the water and often times can cause algae to form.

The type of filter and type of debris will determine how often the filter should be cleaned. Most cartridge filters need to be chemically cleaned on a monthly basis. DE and Sand filters should normally be cleaned twice a season. Just rinsing a cartridge filter with water or backwashing a sand filter only removes particles from the filter. To remove oils, lotions, calcium and other build up from the filter a good chemical clean is required. BioGuard Strip Kwik is an excellent choice for either a cartridge, DE or sand filter.

WHY Balance Your Pool Water Before Closing

It's important to balance your pool water before closing it for the winter months. Closing a pool with water that is out of balance can cause problems on the pool surface such as scaling, staining and etching.

Should I use my Auto Cover as my Winter Cover?

In warmer climates an auto cover works great as a winter cover, but in our area we advise against it. Mother Nature can often cause conditions that are impossible for your cover to withstand and you are left with a costly repair to your cover and possibly your pool deck. Each year we get calls regarding autocover failure during the winter months. Although some people do, it is taking a gamble using it.

We recommend investing in a winter safety cover which can save you from having damage occur to your pool, cover and decks like you see in the picture below.

Security for the winter months!

CoverLogix safety pool covers are an attractive and functional addition to your pool that will provide peace of mind by creating a protective barrier between your pool, family, friends and pets. Enjoy the comfort of knowing your pool is secure and that your spring opening will be much easier! A CoverLogix safety cover will be an investment you will wish you had made years ago! Give us a call to order yours today.

DJY Tips for Closing Your Pool

Wait until the water temperature is below 60 degrees to close your pool.

1. **Clean your pool.** Brush, clean the waterline and vacuum.
2. **Balance water.**
3. **Clean your pools filter** using a filter cleaning product.
4. **Add winter chemicals** and circulate for 24 hours.
5. **Lower pool water level below returns.** If freezing temperatures are occurring do not lower level until you are closing pool down.
6. **Evacuate water from lines and equipment.**
7. **Add rubber expansion plugs** to prevent water from getting back into lines and equipment.
8. **Add pool anti-freeze to the skimmer.**
9. **Cover pool.**

Hot Tub Cover Options

Vinyl Hot Tub Covers

If your cover weighs about 200 lbs., making it difficult to use your tub, it's time for a new cover. The cover has lost its insulating value and is costing you more money on your energy bill.

If your cover puddles when it rains that normally means your cover has broken or bowed foam cores and you should replace the cover. Your cover is costing you money if heat is escaping through a torn hinge.

If your cover has a foul odor which makes your time in the hot tub less enjoyable, you need a new cover. A good cover makes a big difference in your hot tub experience.

Not all covers are made the same. We carry quality Core covers. Give us a call or stop in today to order a replacement cover.

Reasons to Insist on a Core Cover

1. Steel reinforcement for extra foam strength.
2. Tapered foam core.
3. Vapor seal wrap to help prevent mildew.
4. Heat seal gasket.
5. Energy efficient foam Cores.
6. Triple Reinforced Tie-Down Straps.
7. Super strength padded handles.
8. Double stitching on cover for extra strength.
9. 4 layers of vinyl in the sturdy hinge.
10. 28 Points of internal reinforcement.
11. Marine Grade Vinyl.
12. Full 3 Year Warranty on materials & workmanship.
13. UL classification with ASTM Safety Standard.

Give us a call to place your order.

Big Green Egg

The Ultimate Cooking Experience®

You'll find the Big Green Egg to be the most versatile barbeque and outdoor cooking product on the market. It has more capabilities than all other conventional cookers combined. You can grill, sear, bake, roast, and smoke with amazing results.

The Big Green Egg retains heat and moisture so well that foods just don't dry out! Fish, poultry, meats and vegetables are naturally tastier because the juices and flavors stay locked inside for a taste sensation you must experience to believe. You can perfectly prepare anything from a steakhouse-style grilled porterhouse to a tender brisket, turkey or pork tenderloin. Pizza on an Egg is in a class of it's own! You may never want to cook inside again!

The Big Green Egg is available in seven convenient sizes to accommodate any lifestyle!
